CORE COMPETENCIES

CAREER TIMELINE

EXECUTIVE PROFILE

- o **Enterprising professional with more than 7 years of rich and extensive experience in Data Analysis / MS Azure Services.**
- o **Excelled in** understanding the needs of the business, its strategic direction and identifying initiatives that will allow a business to meet those strategic goals; coordinating data handoff for analysis and integration into reporting
- o **Talented Engineer** with exceptional background in utilizing data from diverse information systems and performing analysis of large data sets to remarkably improve organizational decision making capabilities
- o **Skilled in:**
 - o Creating Pipeline in Azure Data Factory, Logic App, Data Bricks, Runbook.
 - o Creating various reports in the for the application software for the clients and linking them with **Microsoft Azure.**
- o **Connecting MS Azure** Storage with SQL server for the Power BI Dashboard
- o **Created DAX Queries to generate computed columns in Power BI.**
- o **Working on Microsoft Azure and SQL** for automation tasks that needs to be delivered in a tight timeline for the clients and executing the process in the given time.
- o **Skilled in managing project management activities,** encompassing planning, design, scope definition, estimation, resource administration, client interaction for understanding change requests and project delivery
- o **Data Factory Pipeline for the automation process**
- o **Exposure in** applying numerous techniques (Cleansing, Transforming, Organizing, Validating or Modelling) on datasets to discover insights that would help improve value for the business or product
- o **Automating existing various product features with the help of Azure Services**
- o **Knowledge of CI/CD Pipeline.**

WORK EXPERIENCE

2021 -Present Condeco Software Pvt Ltd(Eptura International) – Principal CloudOps Engineer

Played a key role in:

- o Handling 5 products with different Database Environment among them i.e., Azure SQL, SQL SERVER Hosted, Postgres SQL, MS SQL, Cosmos DB
- o Quality Assurance on the reports published, documentation of Business Rules, preparing process related presentations and flow rules. Optimizing the SQL Scripts for efficient results.
- o Upgrading the database from lower version to the higher version by the SQL scripts and applying web installation files or Patch.
- o Creating various pipelines in Azure Data Factory / Data Bricks / Logic App's.

- **Handling application defects** and making sure everything is delivered in time and working on automating the existing process so that burn rate can get reduced.
- Closely monitoring the performance of application/ software – Applying various database level fixes like index fragmentation automaton **Delivered recommendations** to the reporting manager for streamlining the process.
- Keeping a check on database utilization so as to keep the costing off database in control.
- **Creating various** Logic Apps for the automation of various reports.
- **Developing various** automated reports from Azure runbook and logic app.
- Secured the delivery of all requests by effectively **auditing processes to improve productivity, achieve SLA's**; ensured adherence to compliance, benchmarking, and established the best practices by utilizing the statistical analysis and performance review techniques
- **Managing work allocation among the team members**
- **Troubleshooting** various API's via Postman and by Azure APIM.
- **Excelled in** understanding various configuring infrastructure Azure services for deployment into UAT and Production environments.
- **Presenting client specific actionable information through formulation of daily, weekly and monthly reporting framework**; designing and conceptualizing dashboard views and standardizing reporting formats across geographies and functions
- Created various automations for decreasing the manual work and to have efficiency and better performance.

2020-2021 with Cvent as Senior Associate-Database Marketing

- **Examining the gaps** between Data Sources, accumulating the SQL scripts as well as associating with the sales and marketing team in order to improve the process reports including marketing and lead update dashboard
- **Focused on** planning Virtual Events, via data interpretation and working in a very short SLA to deliver the best in tough situations.
- **Gained extensive exposure** in marketing strategy, planning, measurement, and analysis, Customer Contacts Management and database marketing.
- **Proactively working** on Data Acquisition strategies to get a good dataset for the organization from different vendors.
- **Worked on** all kinds of reports such as revenue model, license model according to country and by client requirement.
- **Pro-actively administering** the campaigns and participating actively in project discussions for gathering requirements from the business groups.
- Managing work allocation among the team members

2016-2020 with Wunderman Private Ltd. For Microsoft as Senior Associate-Data Operations

- **Headed regional data cleansing projects**, segmentation of records, data standardization, data uploads and data acquisition for enhancing the database quality.
- Conducting **source mapping, analysis (quantitative and qualitative) and validation of data**
- **Drawing relevant conclusions** from the reports developed/ submitted and providing the same to the top management in taking critical decisions.
- Explore Data in a variety of ways and across **multiple visualizations using Power BI**.
- **Worked on all kinds of reports such as revenue model, license model according to country and by client requirement.**
- **Web Based Application** for Data Hygiene Process implemented on **Asp.net** front end and connected with SQL
- **Managing work** allocation among the team members

Delivered:

- Delivered training to **Microsoft Corp. Team**
- Various database automations projects with zero defects that has lead to more efficiency of the application.
- **Various automations that are developed on Logic Apps and Runbook connected with SQL server** to reduce manual effort and reduce burn rate.
- Handled a **team of 10 folks** by equally managing work among them and resolving their issue
- Providing training to the team members of new tools and process.
- Performed **in-depth analysis of the application to check the performance.**
- **Presenting client specific actionable information through formulation of daily, weekly and monthly reporting framework**; designing and conceptualizing dashboard views and standardizing reporting formats across geographies and functions

IT SKILLS

- **Databases:** Azure SQL, SQL Server, Postgres SQL, MS SQL
- **BI Tool:** Power BI
- **Cloud Computing:** Microsoft Azure
- **Tools:** Microsoft Office (Access, Word, Excel, and PowerPoint), MS Outlook.
- **Platforms:** Window 7/10
- **Azure DevOps:** Azure Logic App, Azure Data Factory, Data Bricks, Key Vault, Azure WebApp Service, VSTS, Runbook
- **AWS: Basic Knowledge of AWS**
- Proficiency in **SQL (Structured Query Language)**

EDUCATION

2016

Bachelor of Technology in Computer Science from Maharishi Dayanand University

2012

Higher Secondary from S.P.S(Affiliated from CBSE)

2010

Higher Secondary from S.P.S(Affiliated from CBSE)

Other Courses:

 Google Analytics Certified

 Microsoft Certified: Azure Administrator Associate(AZ-104)

PERSONAL DETAILS

Date of Birth: 28th July 1994

Languages Known: English, Hindi

Address: A-1 Upper Second Floor Tagore Garden Extension, New Delhi, 110027, India
